1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved.

2. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its components and understanding how they relate to each other.

3. After analyzing the problem, the next step is to develop a plan. This involves deciding on the best course of action to take and setting goals for the solution.

4. The final step in the process is to implement the plan. This involves putting the plan into action and monitoring the results to ensure that the problem is solved.
